

# Agenda - WP7 Internal Meeting

Munich, December 5 - 7

Alexander Bornik

December 4, 2006

## Todo List

- 12 months report
  - Should be straight forward: Summary of what we've been doing.
  - Do we have to coordinate that with Graz/WP4?
- 18 months plan
  - How will we work together in the next months?
  - What will be the common interface etc. .... ?
  - Discuss demo scenario - AR Dungeon Master?
- Deliverable 7.1
  - Design of UTQL  $\Rightarrow$  Query API
  - We have a full OpenTracker 1.1 document, which just needs to be updated to 2.0 = text for sensor API part
  - Writing Deliverable
- General discussion
  - How do we sell our ideas to the consortium?
    - \* Fact: Mixed Reality aspect is totally missing in other WPs (mostly VR only!)
    - \* But: MR is mentioned in the contract. Reviewers will probably miss it.

- \* Our demo scenario could bring it in! ... and make us very "important" for the other partners.
- Technological impact is missing in *Presenccia*
  - \* Mentioning other projects e.g. *TrackFrame* financed by BMW and EADS could help.

- ...

## Prepare List

- Look at Document Templates
  - 12 months report
  - 18 months plan
  - Deliverable
- Read and think about current UTQL specification ...
- Read Anthony Steed's PDMR proposal.
- ...
